

# Questions people frequently ask their health care provider about hepatitis C

## Monitoring my health

- What tests will I need to find out if my liver has been damaged from hepatitis C?
- How often should I have tests to check for liver damage?
- What can I do to prevent liver damage?
- Should I see a specialist who treats people who have hepatitis C?

## Accessing treatment

- Could I get treatment for hepatitis C?
- What are the steps to get treatment?

## Getting more information

- Where can I get more information about hepatitis C?
- Where can I get vaccinated against hepatitis A and B, pneumonia, and the flu?
- What do I need to know before telling others that I have hepatitis C?
